The IDS entered as paper 5 on the file face has a certification that it was mailed on 11/27/01, which precedes the 11/6/02 rejection. Upon consideration of this IDS, the following reference has been found pertinent. This will be a non-final rejection as it is not Applicants' fault the reference was not considered prior to the 11/6/02 Office action. The Office regrets any inconvenience this delay in consideration may have caused Applicant.

Claim Rejections - 35 USC § 102

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-27 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by WO 94/10558 (references as WO hereafter).

WO teaches a test device having a stack of disposable electrodes that are held in a stack by a spring. The electrodes are orientated and configured to engage the housing. Each electrodes contains all of the reagents necessary to perform an analysis which include biological fluids analysis for glucose and ethanol as well as environmental contaminants such as ammonia, chlorine, phenols and heavy metals. The last two paragraphs on page 2 through page 3 teach means to move the individual electrodes within the magazine, which have been read on the claimed transport member. Page 5 describes fig. 5 as having "O" ring seals that form an airtight seal and have been read on the claimed sealing means. The ejector means is taught as being able to restrain the electrodes from coming out of the magazine as well as having means to eject the electrodes and has been read on the claimed means to restrain the electrodes.
